HAJÓVERETEK

NONOX®
KORRÓZIÓÁLLÓ ACÉLTERMÉKEK

Mit is takar a **NONOX** márkanev?

Korrózióálló acélból készült kötés- és rögzítéstechnikai alkatrészek komplett palettája. Ilyenek pl. a csavarok, anyák, alátétek, szegecsek, dűbelek, békazárak, sodronyok, láncok, hajóveretek és ezek szerelvényei stb.

Mik a közös jellemzői ezeknek a termékeknek?

1. Alapanyagukat tekintve:

- A legkorszerűbb ausztenites szerkezetű nemesacél ötvözetek.
- Megfelelnek a nemzetközi normáknak, az egész világon alkalmazzák őket.
- Nagy mértékben ellenállnak az agresszív folyadékoknak, gőzöknek és gázoknak.
- Hegeszthetők, polírozhatók.
- Felhasználhatók az élelmiszeriparban, a vonatkozó élelmiszeripari előírásoknak megfelelnek.
- Az egész világon előírások rendelkeznek továbbá vegyiparban, energiaiparban, az egészségügyben stb. történő alkalmazásukról.

2. Maguk a **NONOX termékek:**

- Nagyon magas szintű gyártási technológia, és folyamatos minőségi kontroll mellett készülnek.
- A minőségbiztosítási lánc az alapanyaggyártástól egészen a felhasználásig terjed.
- Élettartamuk sokkal hosszabb, mint a hasonló szénacél, felületkezelte termékeké.
- Bár mechanikai és felhasználási tulajdonságaik eltérnek, szilárdságuk megközelíti a leggyakrabban használt szénacél termékek szilárdsági értékeit.
- Előnyös tulajdonságaik miatt egyre elterjedtebbek az építőiparban: kültéren időjárásállóságuk, nagy teherbírásuk és élettartamuk, beltéren az előbbieken kívül a kor ízlésének megfelelő esztétikai megjelenésük miatt is.
- Előszeretettel alkalmazzák a műszeriparban is, mert bizonyos ötvözetek antimagnetikus tulajdonsággal is rendelkeznek.
- Rozsdamentes szerkezeti munkák el sem képzelhetők megfelelő nemesacél kötőelemek és kiegészítők felhasználása nélkül, mivel ezek az anyagok nem alkalmazhatók szénacélokkal keverten.

Keresse a NONOX márkajelzést!

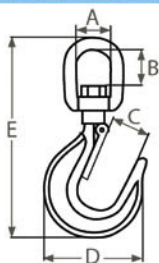

Mi garantáljuk, hogy mindig az igényeinek leginkább megfelelő nemesacél termékeket szállítjuk Önnek!
